# Jak najít exploit – otevřený internet

11 / 27

The screenshot shows the Exploit Database website interface. At the top, there is a dark blue header with the 'EXPLOIT DATABASE' logo and a spider icon. Below the header, there are filter options for 'Verified' and 'Has App', both with unchecked checkboxes. A 'Show' dropdown menu is set to '15'. To the right, there is a search bar with the label 'Search:'. The main content area displays a table of exploits with columns for Date, D (Download), A (Add), V (Verify), Title, Type, and Platform. The table contains seven rows of exploit entries.

Date	D	A	V	Title	Type	Platform
2022-05-12	↓		×	TLR-2005KSH - Arbitrary File Delete	WebApps	Hardware
2022-05-12	↓		×	Royal Event Management System 1.0 - 'todate' SQL Injection (Authenticated)	WebApps	PHP
2022-05-12	↓		×	College Management System 1.0 - 'course_code' SQL Injection (Authenticated)	WebApps	PHP
2022-05-12	↓		×	F5 BIG-IP 16.0.x - Remote Code Execution (RCE)	Remote	Multiple
2022-05-11	↓		×	TLR-2005KSH - Arbitrary File Upload	WebApps	Hardware
2022-05-11	↓		×	Ruijie Reyee Mesh Router - Remote Code Execution (RCE) (Authenticated)	Remote	Hardware

## Anonet

?

## Freenet

A darknet that is primarily concerned with censorship rather than privacy. It is used for storing data. Will expose your IP unless you use another darknet (ie a VPN) in conjunction, or only use peers you trust.

## Tor

The most well known of darknets, and one of the first. One of the best for circumventing firewalls. Tor operates by routing a given connection through a series of nodes, and optionally a bridge if necessary.

## I2P

The second most well known darknet, I2P operates in a peer-to-peer manner.

I2Prouter	<a href="https://geti2p.net/">https://geti2p.net/</a>	Written in Java, the standard router
I2P+	<a href="https://i2pplus.github.io/">https://i2pplus.github.io/</a>	A fork of the Java router
I2Pd	<a href="https://i2pd.website/">https://i2pd.website/</a>	Written in C++, is easier on resources and more minimal
Kovri	<a href="https://web.getmonero.org/resources/moneropedia/kovri.html">https://web.getmonero.org/resources/moneropedia/kovri.html</a> [Archive]	An in-development i2p thing designed for the Monero/XMR cryptocurrency

## Gnunet

?

## Lokinet

An onion router that seeks to fix Sybil attacks by way of having exit nodes be invested in. <http://web.archive.org/web/20211228031014/http://cheapskatesguide.org/articles/lokinet.html>

The screenshot shows the Tor Project website homepage. At the top left is the Tor logo (a white onion) and a yellow 'Donate Now' button. The navigation menu includes 'About', 'Support', 'Community', 'Blog', and 'Donate'. On the right, there is a language selector for 'English (en)' and a 'Download Tor Browser' button with a downward arrow. The main content area has a dark purple background with the text 'Browse Privately. Explore Freely.' in large white font. Below this, it says 'Defend yourself against tracking and surveillance. Circumvent censorship.' and another 'Download Tor Browser' button with a downward arrow.

The screenshot shows the homepage of 'The Hidden Wiki'. At the top left is a circular logo with a red ribbon and a checkmark, containing the text 'THE HIDDEN WIKI' and 'VERIFIED ONION LINKS'. To its right, the title 'THE HIDDEN WIKI 2022' is displayed in purple and green. A prominent red banner with white dashed borders features the text 'ESCROW MARKETPLACE' in large, bold, white letters. Below this, a grey box contains a welcome message: 'Welcome To The Official Hidden Wiki - 2022'. The main content area includes the text: 'The Hidden Wiki - This is the easiest way to find information on the Tor network. Only working links and trusted sites.', a warning: 'If you were deceived in TOR, [contact us](#) and provide proofs so that we can mark this site as **SCAM!**', and a note: 'Add our site to the **BOOKMARKS** so you will not lose the link!'. A 'SEARCH ENGINES' section is partially visible at the bottom. On the right side, there is a vertical advertisement for 'BLACKMART HIDDEN MARKETPLACE' featuring a purple skull icon, logos for VISA, Mastercard, AMEX, PayPal, Amazon, Google Play, Apple, and WU, and the word 'ESCROW' at the bottom. The background of the ad is black with yellow 'LE SALE SALE' text.

## Online Spyware Watchdog

The goal of this website is to classify spyware programs, so that users can be more aware that they are installing spyware.

Many "everyday" applications are actually spyware. **We take an expansive and strict stance on what constitutes spyware.** We define spyware as anything that includes telemetry, phoning home, automatic updates or is listening in without the user's knowledge or consent.

This website contains articles on popular programs with explanations of the spyware features found in them. Included are easy to understand ratings, detailed explanations, and proof, of how features of these programs can spy on the user.

If you want to contribute to this website, you can always [make a pull request](#).  
All contributions must be licensed under the CC0 license to be accepted.

~14 mins | Published by [Darknetlive](#) on 18 May, 2022 in [News](#) and tagged [Darkweb Markets](#) using 2948 words. | [16 Comments](#)

The Versus Market exploit is legitimate, Paris claimed.

A user on Dread ([/u/threesixty](#)) hacked Versus Market “in a time span of about 2 hours,” according to a post on the Versus subdread. “Please remove security driven from your website title. You are not security driven.”

### Hacked, you are not security driven

by [/u/threesixty](#) · 2 days ago\* in [/d/Versus](#)

Please remove security driven from your website title. You are not security driven. Yes, I could probably just extort you or become a payoff for keeping quite about this, but no thank you. You can still pay me though.

This happened in a time span of about 2 hours. Think about what LE and advanced hackers might have done in the meantime.

- ✓ Brát bezpečnost vážně
  - ✓ Důslednost, systematičnost, vytrvalost
- ✓ Nepřítahovat pozornost
  - ✓ Sledovat zranitelnosti
  - ✓ Odstraňovat je
  - ✓ Nekomunikovat je
- ✓ Mít svou digitální stopu pod kontrolou
  - ✓ OSINT
  - ✓ Proaktivní kroky

- ✓ Trend v plánování útoků (nejen kyber)
  - ✓ Útoky na organizace
  - ✓ Útoky na osoby
- ✓ OSINT lze jen velmi obtížně zachytit
- ✓ Český jazyk – pomalu ztrácí svou výhodu
- ✓ Kdo z nás má svou digitální stopu pod kontrolou?

Emily Stamm  · Mar 8, 2021 · 5 min read

## A Beginners Guide to OSINT

OSINT - Open Source Intelligence that refers to a collection of data/information by exploiting publicly available resources. It is used for digital intelligence and investigation process that uses cyber tools to find strategic information in open sources that are obtained legally and ethically.

<https://www.csnp.org/post/a-beginners-guide-to-osint>

I-INTELLIGENCE

OPEN SOURCE INTELLIGENCE  
TOOLS AND RESOURCES HANDBOOK

<https://i-intelligence.eu/>

- ✓ Nepodceňovat digitální stopy
- ✓ Mít přehled o zranitelnostech
- ✓ Pravidelný OSINT – organizace, osoba
- ✓ Brát bezpečnost vážně

- ✓ Otevřený WEB, deepweb, darknet
- ✓ Organizace, osoba
- ✓ Vazby mezi subjekty, uniklé dokumenty a data, hesla, osobní data
- ✓ Nejde o levnou službu (placené přístupy do tržišť)
- ✓ OSINT vyplatí, jde o nezbytnou součást bezpečnosti
