Dental Hygienist

- a person who is trained and licensed to clean teeth, take dental x-rays, and provide related dental services and care, usually under the supervision of a dentist.

- provides preventive oral care under a dentist's supervision. They clean patients' teeth and examine their mouths for signs of damage, gingivitis (untreated gingivitis can progress to periodontitis), and other diseases. They teach patients how to maintain good oral health.

Periodontitis also called gum disease, is a serious gum infection that damages the soft tissue and, without treatment, can destroy the bone that supports your teeth. **Periodontitis** can cause teeth to loosen or lead to tooth loss.

Mouth Vocabulary:

Tooth, teeth

Lip

Upper lip

Lower lip

Tongue
