

The Social Progress Index asks universally important questions about the success of our societies

SOCIAL PROGRESS INDEX

BASIC HUMAN NEEDS

Nutrition & Basic Medical Care

Do people have enough food to eat and are they receiving basic medical care?

Water & Sanitation

Can people drink water and keep themselves clen without getting sick?

Shelter

Do people have adequate housing with basic utilities?

Personal Safety

Do people feel safe?

FOUNDATIONS OF WELLBEING

Access to Knowledge

Do people have access to an educational foundation?

Access to Information & Communications

Can people freely access ideas and information from anywhere in the world?

Health & Wellness

Do people live long and healthy lives?

Enviromental Quality

Is this society using its resources so they will be available for future generations?

OPPORTUNITY

Personal Rights

Are people's rights as individuals protected?

Personal Freedom & Choice

Are people free to make their own life choices?

Inclusiveness

Is no one excluded from the opportunity to be a contributing member of society?

Access to Advanced Education

Do people have access to the world's most advanced knowledge?

The 2020 Social Progress Index aggregates 50 social and environmental outcome indicators from 163 countries

SOCIAL PROGRESS INDEX

BASIC HUMAN NEEDS

Nutrition & Basic Medical Care

- Undernourishment
- Maternal mortality rate
- Child mortality rate
- Child stunting
- Deaths from infectious diseases

Water & Sanitation

- Deaths attributable to unsafe water, sanitation and hygiene
- Populations using unsafe or unimproved water sources
- o Populations using unsafe or unimproved sanitation (%)

Shelter

- Access to electricity
- o Household air pollution attributable deaths
- Usage of clean fuels and technology for cooking

Personal Safety

- Homicide rate
- Perceived criminality
- Political killings and torture
- Traffic deaths

FOUNDATIONS OF WELLBEING

Access to Knowledge

- Women with no schooling
- Primary school enrollment
- Secondary school attainment
- Gender parity in secondary attainment
- Access to quality education

Access to Information & Communications

- Mobile telephone subscriptions
- Internet users
- Access to online governance
- Media censorship

Health & Wellness

- Life expectancy at 60
- Premature deaths from non-communicable diseases
- Access to essential services
- Access to quality healthcare

Environmental Quality

- Outdoor air pollution attributable deaths
- Greenhouse gas emissions
- Particulate matter
- Biome protection

OPPORTUNITY

Personal Rights

- Political rights
- Freedom of expression
- Freedom of religion
- Access to justice
- Property rights for women

Personal Freedom & Choice

- Vulnerable employment
- Early marriage
- Satisfied demand for contraception
- Corruption

Inclusiveness

- Acceptance of gays and lesbians
- Discrimination and violence against minorities
- Equality of political power by gender
- Equality of political power by socioeconomic position
- o Equality of political power by social group

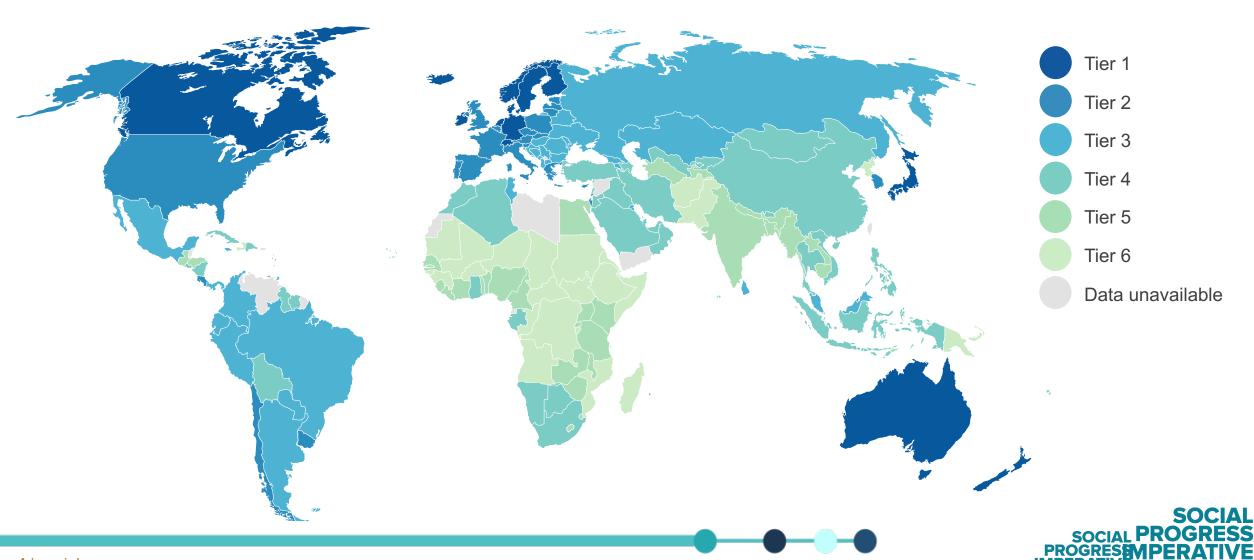

Access to Advanced Education

- Expected years of tertiary education
- Women with advanced education
- Quality weighted universities
- Citable documents

On average, the world is improving...but progress is slow and uneven

Since 2011, the population-weighted world average score has **improved by 3.61 points**.

Since 2011, **155 countries** (95% of those measured) have improved by one point or more. Three countries (2%) have declined. Of the 155 countries that improved, **69 countries** (42%) have improved by five or more points.

On average, the world is improving...but progress is slow and uneven

From 2011 to 2020 the world improved on 8 of 12 components

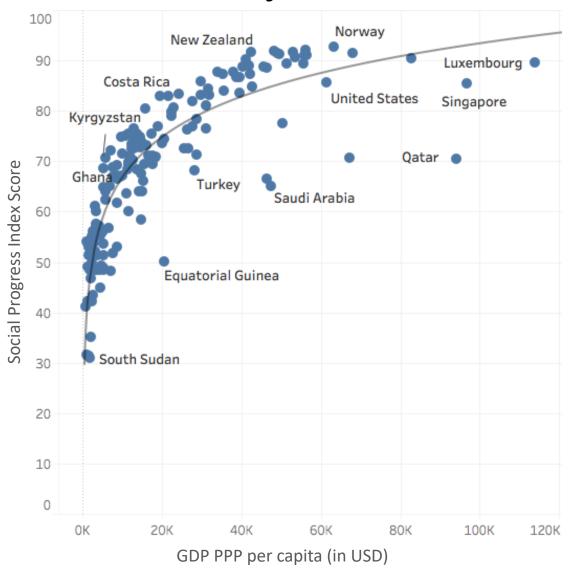

Since 2011, the world has improved most on Access to Information and Communications, Access to Advanced Education, Shelter and Water and Sanitation.

World progress has been uneven, with declines in Personal Rights and Inclusiveness, and stagnation on Personal Safety and Environmental Quality.

GDP is not destiny

Across the spectrum, we see how some countries are much better at turning their economic growth into social progress than others.

Comparing national performance

- The Social Progress Index disentangles the social and economic aspects of countries' performance, making it possible to compare a state's quality of life to that of its economic peers.
- We define a country's economic peers as the 15 countries closest in GDP per capita PPP.
- By analyzing a country's performance relative to its economic peers, we can uncover which countries are best at turning each dollar of income into better social outcomes.
- We can also analyze the world's performance relative to its wealth by comparing its scores to the 15 countries closest in GDP to the global average.

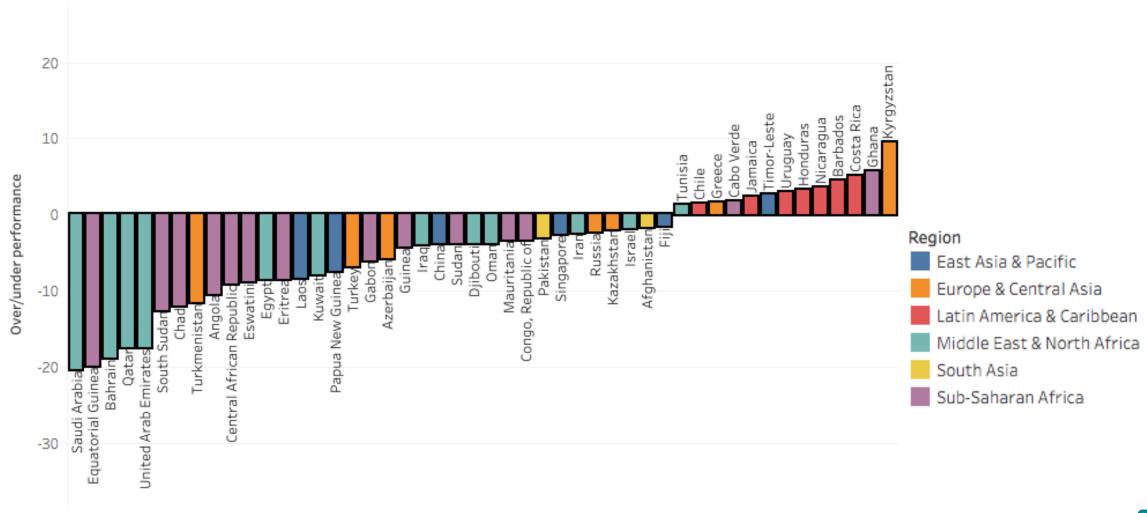

Just 13 countries over-perform on social progress relative to their incomes, while 35 countries are underperformers.

Kyrgyzstan and Ghana over-perform by the greatest margin, while Saudi Arabia and Equatorial Guinea are the biggest underperformers.

Over- and underperformers on social progress

G7 social progress 2011-2020

The US is the only G7 country that has gone backwards on social progress. It is also one of only 3 countries where social progress has declined, along with Brazil and Hungary.

US social progress: 2011 to 2020

Since 2011, the United States has improved most on Access to Information and Communications and Environmental Quality.

There have been significant declines in Personal Safety, Personal Rights and Inclusiveness.

The Social Progress Index captures outcomes related to all 17 Sustainable Development Goals in a simple but rigorous framework designed for aggregation, making it an invaluable proxy measure of SDG performance.

Covid-19 pandemic threatens to set progress against the Sustainable Development Goals back a full decade

Based on 2020 Social Progress Index projections, if current trends continue the world won't achieve the Sustainable Development Goals 2082 – missing the 2030 target by more than a half-century.

And unless urgent actions are taken, the Covid-19 pandemic and accompanying economic crisis risk setting social progress in the world back by another decade, pushing out achieving the SDGs until 2092.

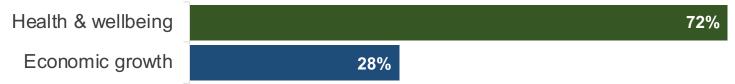

Majority across countries hit hardest by the pandemic prioritize social progress over economic growth

Social Progress Index-Ipsos global poll – July/August 2020

7 out of every 10 people prioritize health and wellbeing over GDP during coronavirus crisis.

Thinking about the current situation with Covid-19...which should your country prioritize more?

More than half still want their country to prioritize social outcomes when the pandemic is over.

Imagining when the Covid-19 pandemic is over...which should your country prioritize more?

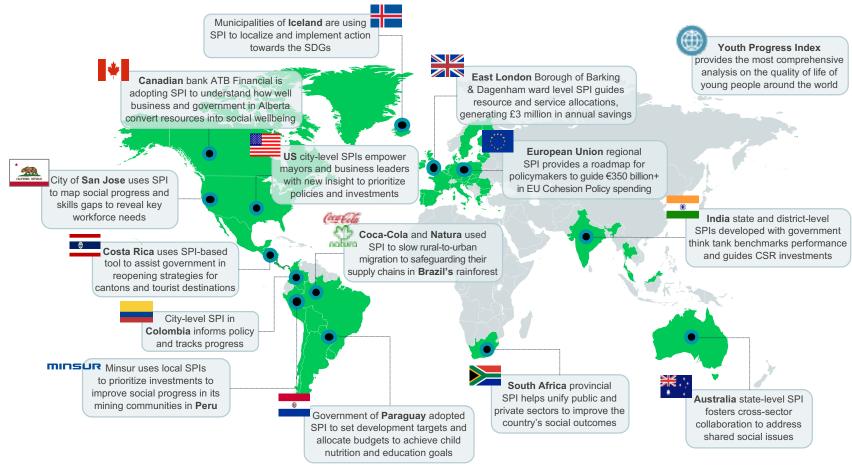

Poll conducted between July 24 and August 7 2020 in random sample of adults in 13 countries - Australia, Brazil, Canada, Chile, India, Italy, Mexico, Peru, South Africa, Spain, Russia, UK and US.

From Index to Action to Impact

Delivering local data and insight that is meaningful, relevant and actionable

Global network of local partners delivering subnational Social Progress Indexes that have revealed the true state of the society for more than 2.7 billion people across 45+ countries.

Appendix: Methodology

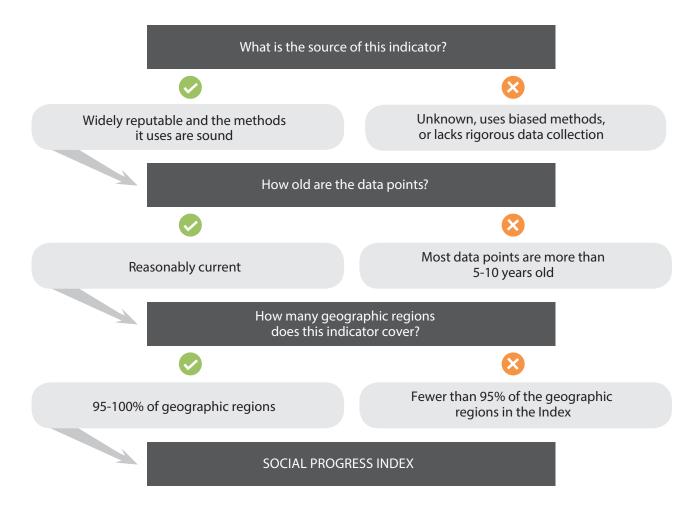

Social Progress Index design principles

Social Progress Index indicator selection

Component methodology

$$Component_c = \sum_{i} (w_i * indicator_i)$$

Each component is calculated as the weighted sum of the individual indicators, where the weights are determined by factor analysis.

Calculating dimensions and aggregate index

For each dimension, we calculate the sum of each of the components:

Dimension_d =
$$\frac{1}{4} \sum_{C} Component_{C}$$

The Social Progress Index is the sum across the three dimensions:

SPI =
$$\frac{1}{3}$$
 Dimension_d
