

1. On About You, a Hugo Boss polo shirt was originally sold for CZK 2,400. During the sale, the price was reduced by 30%. After that, the price was reduced by another 20%. How much does this product cost now?

2. A store originally had 200 polo shirts, but customers bought 120 polo shirts during a sale. What is the percentage change in the number of polo shirts after the sale?

3. Sales of polo shirts in three days totaled CZK 65,280, the first day's sales were 20% less than the second day, and the third day was CZK 6000 more than the first day. What were the sales on the first day?

4. You want to start a business with your friends. You have already thought of everything, you are just thinking about how many friends you can hire for the first job from the beginning. Now we don't distinguish their specialization or abilities, only time. Honza promised that he can work 20 hours a month, Vojta 10 hours a week, Zbyněk and Lucie can at any time, but we must not violate the maximum work. time (8 working hours per day).

As your first order, you received the completion of gift packages for employees of a major company. You have to complete the order within 14 days, it will be 500 packages and you assume that each package will take 30 minutes to complete. Can you accept such an order? How do you decide?
